

I am in love with Youthpass!

As a volunteer since I was 18 I believe in non formal education
As a psychologist I believe in the power of evaluation
As a researcher Phd I believe in development measurement

BECAUSE

When I take part, I learn
When I detect my failures I am aware that I have something to change
When I know my marks I daily can improve

I was very happy when last year I was selected in the european training course "Tuning In: learning and Youthpass". What I expected it was got.
After mi participation, I came back to my country and me and my work-team created an innovative system call Portfolio in order to recognize competences and Sustainable Development Goals. This is the link of the video:

I think Youthpass is the neccesary tool that helps you to think about your learning process and move you to new challenges.

THANK YOU
